

Challenge: A consistent, decentralised approach for business users to manage risk, compliance and workplace health and safety

Solution: WorkSafeOnline clean & consistent SAP master data solution

WorkSafeOnline (WSO) is a product used by SAP customers worldwide to help organizations and government agencies to manage health, safety and environmental risk by enabling business users to manage standard business rules, workflows, approvals, escalations to promote accountability and improve risk throughout the business.

WorkSafeOnline is developed by Prospecta Software, founded in 2002, a specialist SAP product development company and SAP Independent Software Vendor (ISV).

The WorkSafeOnline solution comprises of three components:

Health & Safety Modules contain additional sub modules to manage and report:

- ✓ Health
 - Employee Management / Health Check Ups / Injury Management / Rehabilitation
- ✓ Safety
 - Claims / Hazard / Incident / Job Management / Safety & Inspections / Behavior Based Safety
- ✓ Reporting
 - Document Management / Dashboards / Ad Hoc Reports

Configuration

WorkSafeOnline allows you to use of all or a single module with the capability to configure/tailor the module to suit your business. A business super user or administrator has the controls to create new fields, change labels and create ad hoc reports to support your organization.

Integration

WorkSafeOnline utilizes the Acceler8 Business Application & Integration Layer, which governs communication between WorkSafeOnline and other systems like SAP. The integration layer comes with SAP Adapters which communicate to SAP using SAP IDOC technology. These options can be used to distribute Human Resources master data and organizational structures from your SAP HR System to WorkSafeOnline or send safety related work order notifications to SAP Plant Maintenance for example. It is possible to integrate other 3rd party applications using Acceler8 via web services or batch XML.

Typical challenges

Usability

- ✓ Business users are infrequent users of IT systems
- ✓ Inability to capture information at remote sites or in the field

Lack of Accountability

- ✓ Accountability pushed to upward to central Health & Safety Team instead of team leaders and supervisors
- ✓ Limited visibility and reporting capability

Response time to Close out Actions

- ✓ Limited automation of workflows, approvals and escalations

Limited Process Improvement

- ✓ Health & Safety teams focused on data collection rather than analysis and process improvement

Integration

- ✓ Limited or no integration between health and safety areas
- ✓ Incomplete master data records
- ✓ Duplicate data handling

Realizable benefits

Proactive Safety Culture

- ✓ Employees, Team Leaders, Supervisors, interested parties accountable
- ✓ Audit trail
- ✓ Improve safety culture

Reduce Risk

- ✓ Improved visibility of high risk issues
- ✓ Systematic response and management procedures

Business User Efficiency

- ✓ Health & Safety Practitioners to focus on continuous improvement
- ✓ Reduce manual double handling of data entry

Prospecta utilizes experienced SAP Partners to manage solution implementation, Health & Safety module implementations, process design and support so you benefit from the combination of our partners experience and WorkSafeOnline.

Our partners work with you to design, implement the software and integrate processes into the day to day operations of your organization. Our complete solution includes, training and change material to ensure your people, processes and technology are aligned for success.
