

Enterprise mobility

Enterprise mobility is all about Enterprise user being able to access right information at right time on the move. Driving business productivity and future readiness in this scenario requires enterprises to exploit rapidly evolving technology and provide their workforce the necessary tools to enable business on the move. Mobility act as a catalyst in enabling decision makers to access information from anywhere and at anytime.

Companies witnessed ROI by mobilizing their workforce and ability to grow with the current trends of the market. Some of the key areas where Enterprise mobility has greater impact on the ROI and agility are Sale force automation, Mining, Supply Chain, Maintenance, Utilities, and Operations.

WM RF Mobile

Companies that have deployed SAP® warehouse management (WM) software have come to rely on its flexibility and capabilities in managing increasingly complex and time-sensitive shipping, receiving and warehousing tasks. Extending the capabilities of SAP WM software to mobile workers increases the ability of managers to gather data and direct operations in a seamless and efficient manner.

Your Trusted Advisor

Benefits of implementing WMRF

- A significant increase in employee productivity
- A substantial increase in warehouse velocity
- Improved warehouse space utilization
- Reductions in inventory levels
- Improved order accuracy
- Reduced order processing and order to ship time

SAP WM supports the use of automated barcode scanners and RF technology for all stock movements. RFID enabled Warehouse Management helps to structure the work in the warehouse efficiently and cost-effectively, and to control the warehouse workers' work steps clearly and simply via mobile radio-frequency terminals. Many of the internal and external warehouse activities in SAP are supported by the RF connection.

- Goods Receipt
- Goods Movement
- Picking
- Replenishment
- Stock take
- Put away

Mobile Factory

Prospecta Mobile Factory is one stop point for enterprises for their mobile strategy and implementation Road map. Prospecta Mobility team is highly experienced in helping Enterprises with their mobile strategies and implementations across various industry verticals.
